

## Client: Facebook

### Project: Interior Building Drainage

Well known for providing stainless steel drainage, access and surface protection, Component Developments was specified for various products within the Facebook office building.

Working closely with kitchen designers and contractors, Component Developments was able to offer the Facebook building the most ideal drainage solution, appropriate for the needs of the kitchen.

Included in the kitchen were stainless steel drainage channels to suit the resin floor finish. Each of these were manufactured with a built in trapped, vertical waste outlet gully, removable waste baskets and were finished off with high strength anti-slip gratings.

**Stainless Steel:** Drainage Channels | Gratings | Trapped Gullies | Rodding Eyes | Access Covers | Corner Guards | Crash Rails | Kerbs | Special Fabrications

**Accreditations:** ISO 9001:2008 Quality Assurance | ISO 14001:2004 Environmental Management | OHSAS 18001:2007 Occupational Health & Safety

Component Developments is a division of Webster-Wilkinson Ltd.
