

Client: Sheraton Grand Hotel

Project: Interior Building Drainage

Overlooking Edinburgh Castle, the Sheraton Grand Hotel & Spa forms part of a unique gathering place.

The new kitchen refurbishment included high tilting kettles and bratt plans to facilitate the hotels tremendous catering requirements at peak periods.

Wide channels were needed to accommodate the deluge from the tilting kettles. Component Developments created 750mm wide channels, with drip branches directly under the kettle to catch the final pour when the kettle was at maximum tilt. Gullies were also fitted, and included wide baskets to collect the waste products.

Stainless Steel: Drainage Channels | Gratings | Trapped Gullies | Rodding Eyes | Access Covers | Corner Guards | Crash Rails | Kerbs | Special Fabrications

Accreditations: ISO 9001:2008 Quality Assurance | ISO 14001:2004 Environmental Management | OHSAS 18001:2007 Occupational Health & Safety

Component Developments is a division of Webster-Wilkinson Ltd.
