

## Client: 1 Rebel

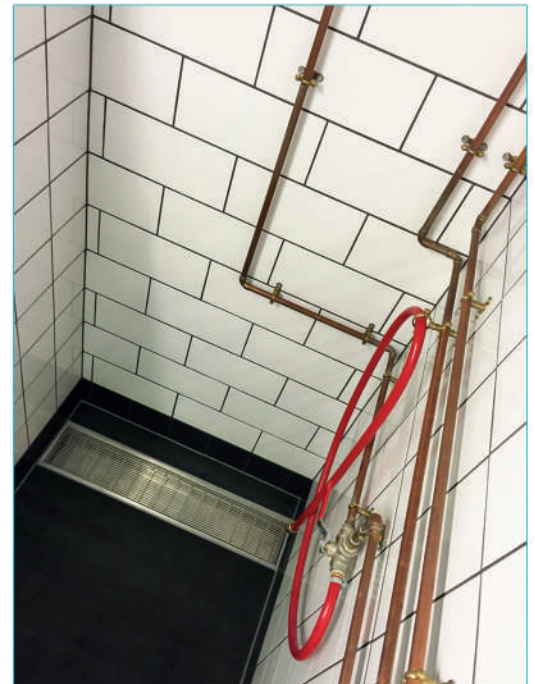

### Project: Interior Building Drainage

With the aim to revolutionise London's fitness industry, forward thinking leisure company 1Rebel offers a no-contract, pay-as-you-train boutique featuring internationally-acclaimed DJ sets while you work out.

Component Developments was approached to supply drainage channels to both the ground floor and lower ground floor showering areas; keeping in line with the industrial design theme.

Two stainless steel channel drains were fitted on the ground floor. On the lower ground floor, a further two of a similar style channel were fitted. Each of the channel's include a built-in-fall towards a stainless steel gully pot, inside of which sits a removable stainless steel odour trap and large basket. Component Developments then added stylish, Heelsafe grating to the channels.

The quality and versatility of Component Developments products supported 1Rebel's vision of creating balance of beauty and function through attention to detail.

**Stainless Steel:** Drainage Channels | Gratings | Trapped Gullies | Rodding Eyes | Access Covers | Corner Guards | Crash Rails | Kerbs | Special Fabrications

**Accreditations:** ISO 9001:2008 Quality Assurance | ISO 14001:2004 Environmental Management | OHSAS 18001:2007 Occupational Health & Safety

Component Developments is a division of Webster-Wilkinson Ltd.
